What is an American Style (Framed) Cabinet?

What is an American Style (Framed) Cabinet?
American cabinet manufacturers have traditionally built cabinets using a framed construction.In this type of cabinet construction,the rails and stiles form a 3/4 inch face "frame" at the front of the cabinet box. This frame resembles a flat picture frame attached to the door front, adding dimension to the door front. The cabinetdoors are secured to the edge of the frame, which gives the cabinet strength and sturdiness.

Our American Style cabinets are made of solid wood doors face frames, and drawer faces with plywood construction cabinet boxes. The wood-dominant feel of the cabinets will bring your kitchen an elegant and timeless effect. To increase storage space efficiency, Our face-framed cabinet does not come with a center stile, allowing easier accessibility than other face-framed cabinets in the industry. HomeCo's face framed cabinets offer both traditional and contemporary designs.

AMERICAN STYLE CABIENTS/FACE FRAMED

Face framed cabinets are traditionally built cabinets with a 1 1/2" face frame that covers the front of the cabinet box. The doors then attach to the face frame, giving an added dimension to the door front. To increase storage space efficiency, HY GLOBAL's face framed cabinets does not come with a center stile, allowing easier accessibility than other face framed cabinets in the industry. HY GLOBAL's face framed cabinets offers both traditional and contemporary designs.

EUROPEAN STYLE CABIENTS/FRAMELESS

Frameless cabinet construction is an European way of manufacturing cabinets that has become popular among American homeowners seeking simple and more contemporary cabinet designs. Frameless cabinet offers greater accessibility by eliminating the face frame. Instead, it relies on thicker box construction for stability. HY GLOBAL's frameless cabinet overs full overlay doors, high quality 3/4" thick solid plywood for cabinet box construction to achieve maximum stability.

EUROPEAN STYLE CABIENTS/FRAMELESS

Frameless cabinet construction is an European way of manufacturing cabinets that has become popular among American homeowners seeking simple and more contemporary cabinet designs. Frameless cabinet offers greater accessibility by eliminating the face frame. Instead, it relies on thicker box construction for stability. HY GLOBAL's frameless cabinet overs full overlay doors, high quality 3/4" thick solid plywood for cabinet box construction to achieve maximum stability.

CABINETS TYPE	European frameless
DOOR FRONT	3/4" thick MDF with Thermofoil melamine veneer
DRAWER FACE	Same as door front
CABINET BOX TYPE	Frameless with full overlay doors
CABINET BOX	3/4" Solid plywood construction
SHELVES	3/4" Solid plywood laminated in white with adjustable pegs
DOOR HINGES	Adjustable concealed hinge with soft close and easy clip on feature
DRAWER SLIDE	Tandembox style drawer system with self-closing feature
CONNECT METHOD	Wood dowel + three-in-one connector (camlock)
